

Aria Operations

EXPERIENCE DAYS

Bengt Grønås and Kate Rychlic

Cloud Management Specialists

torsdag 30. mars 2023

Introduction

BENGT GRØNÅS

- ❑ Senior Solutions Engineer
- ❑ 8 years in VMware
- ❑ Based in Oslo, Norway
- ❑ Covers Nordics and Baltics
- ❑ Often a Lab Captain at VMware Explore / VMworld
- ❑ Music production, long travels; hiking, motorcycle, chess
- ❑ @bgronas

Kate Rychlik

Senior MultiCloud Management Specialist Solution Architect

Aka. Kasia, Katia, etc

2 years in VMware

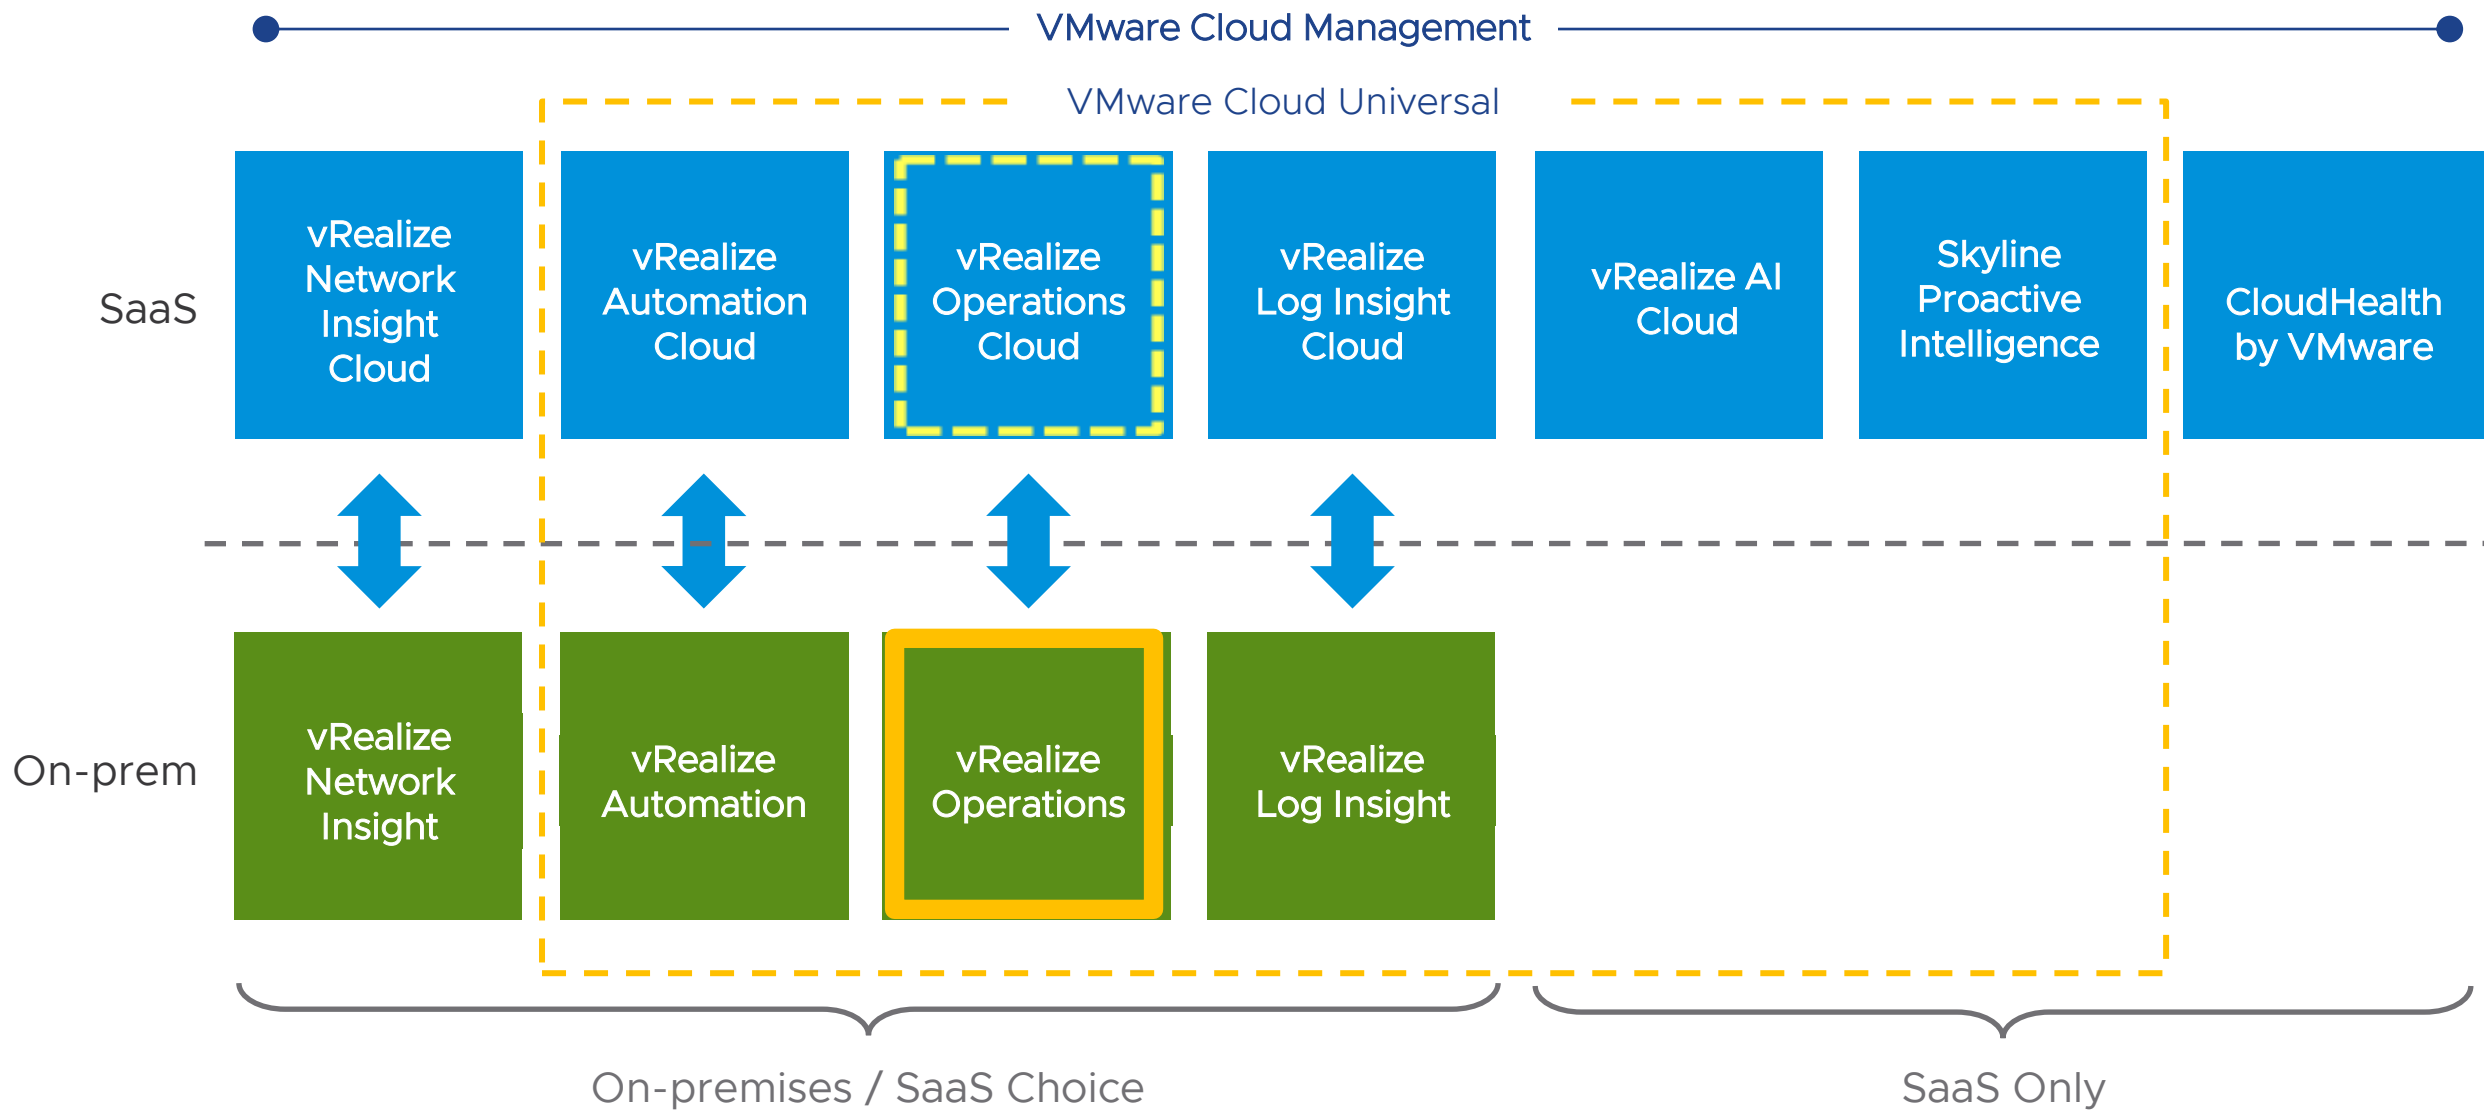

Based in Amsterdam, Netherland

Covers Benelux

Race cars, DIY, skiing, cooking & baking

@krychlik

VMware Cloud Management: vRealize, Skyline, CloudHealth

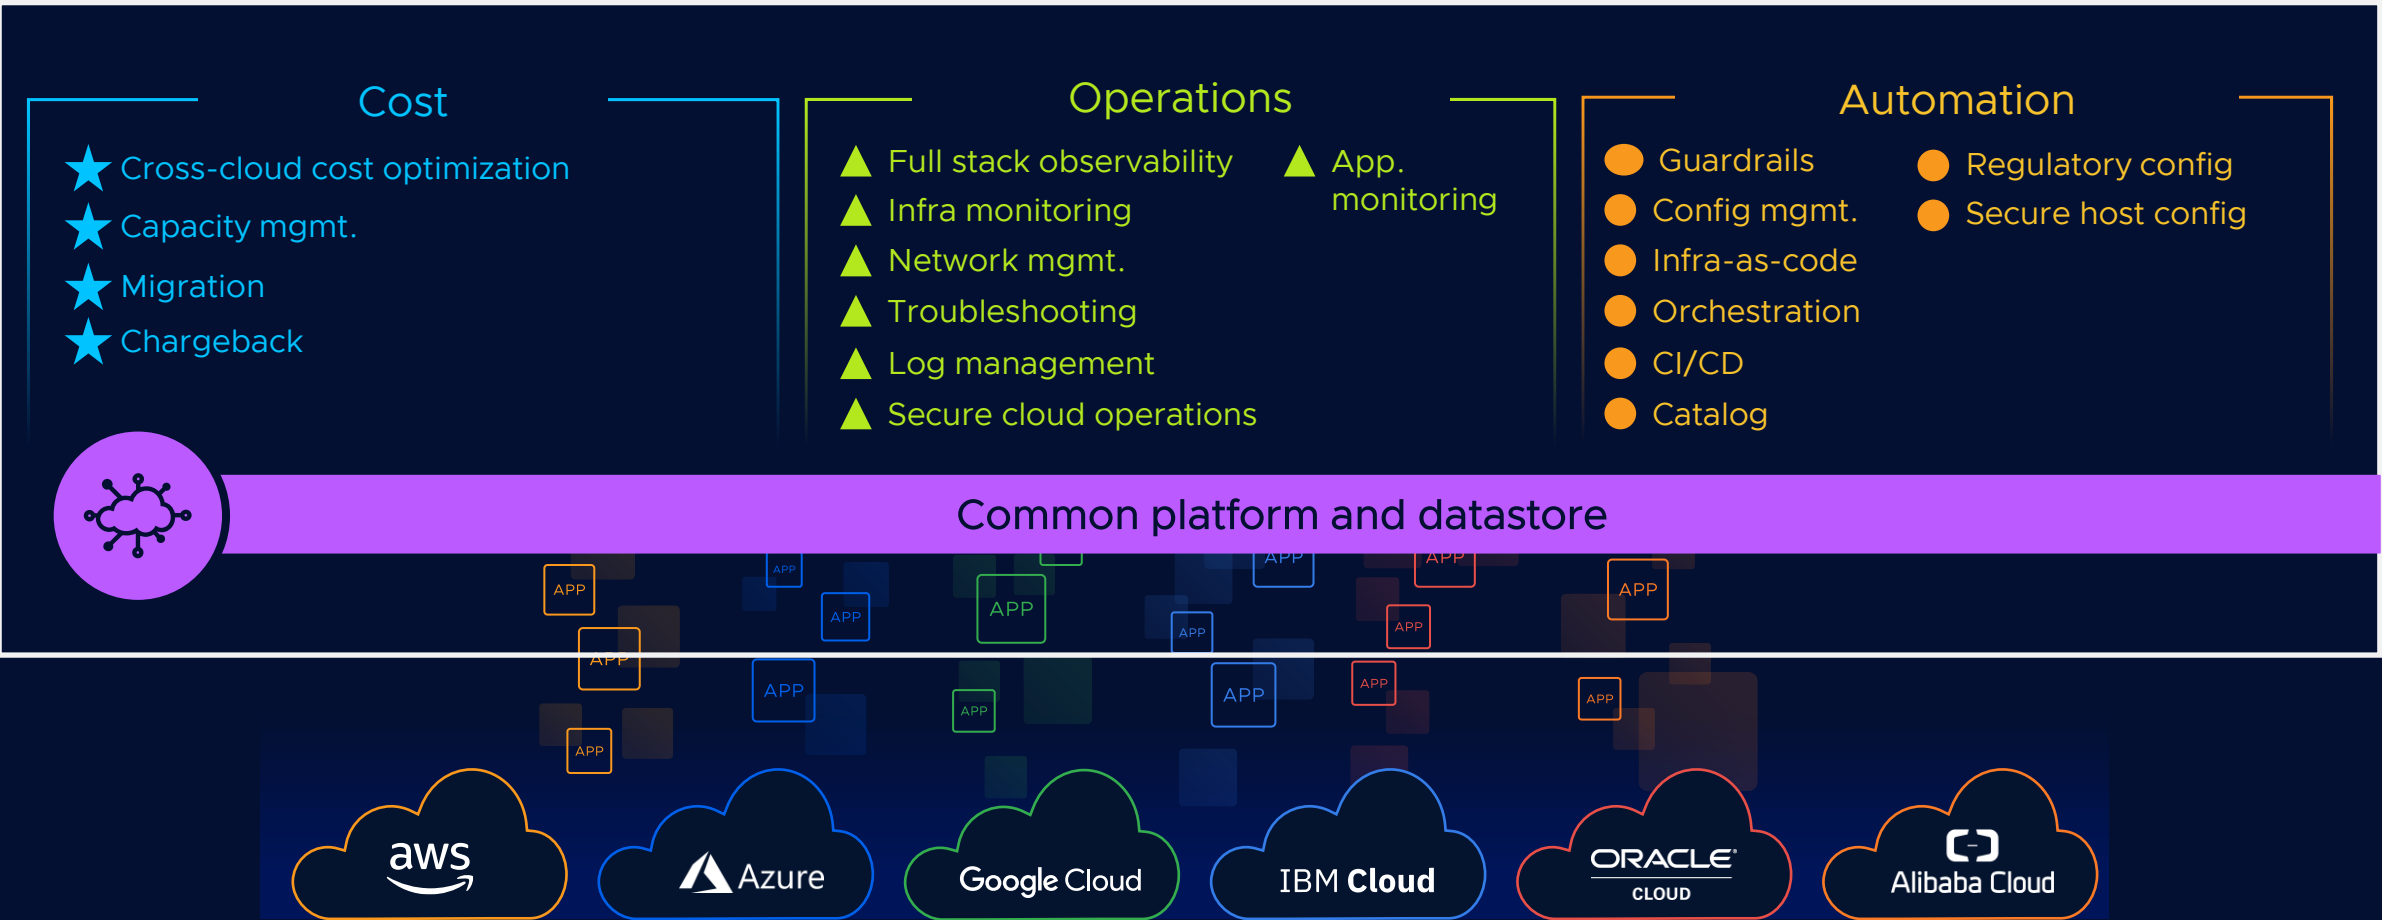

Cloud Management New Family Brand: VMware **Aria**

Old Name	New Name
Automation	
vRealize Automation / Cloud	VMware Aria Automation
VMware Cloud Assembly	VMware Aria Automation Assembler
VMware Service Broker	VMware Aria Automation Consumption
VMware Code Stream	VMware Aria Automation Pipelines
VMware Cloud Templates	VMware Aria Automation Templates
vRealize Orchestrator	VMware Aria Automation Orchestrator
vRealize Automation SaltStack Config	VMware Aria Automation Config
vRealize Automation SaltStack SecOps	VMware Aria Automation for Secure Hosts
CloudHealth Secure State	VMware Aria Automation for Secure Clouds
Operations	
vRealize Operations / Cloud	VMware Aria Operations
vRealize Log Insight / Cloud	VMware Aria Operations for Logs
vRealize Network Insight / Cloud	VMware Aria Operations for Networks
Tanzu Observability by Wavefront	VMware Aria Operations for Applications
vRealize True Visibility Suite	VMware Aria Operations for Integrations
Cost	
CloudHealth	VMware Aria Cost powered by CloudHealth

Old Name	New Name
Suites	
vRealize Cloud Universal	VMware Aria Universal Suite
vRealize Suite	VMware Aria Suite
vCloud Suite	VMware vCloud Suite
CloudHealth by VMware Suite	Discontinued Name
CloudHealth Partner Platform	Discontinued - see Aria Cost powered by CH
Platform & Cross-Cloud Services	
Project Ensemble	VMware Aria Hub
New	VMware Aria Graph
vRealize Migration Manager	VMware Aria Migration
vRealize Automation Cloud Guardrails	VMware Aria Guardrails
Project Ensemble Insights	VMware Aria Business Insights
Other	
Skyline	VMware Skyline
vRealize Suite Lifecycle Manager	VMware Aria Suite Lifecycle
vRealize Cloud Subscription Manager	VMware Aria Hub Subscription
vRealize AI Cloud	Functionality part of Aria Hub; name discontinued

New approach: integrate to deliver customer outcomes anchored by near real-time map of apps and cloud

Why Aria Operations?

#1 in Operations Management

Powered by AI

Proven solution from
the market leader

Native console built for
VMware Cloud

Extensible and integrated

Enterprise-wide
monitoring &
troubleshooting

Why Aria Operations Cloud?

Benefits of cloud service for cloud alignment

Powered by AI

Aria Operations / Aria Operations Cloud

Key Benefits

Accelerate service & innovation delivery	Reduce time to market and automate infrastructure delivery
Improve agility	No hardware and no maintenance
Increase Flexibility	Reduced risk and CAPEX to OPEX
Scale rapidly	Dynamic and reliable with VMware SRE support
Future Ready	Manage traditional and cloud-native workloads across private, hybrid and multi-cloud environments

Use Cases Unlocked by vRealize Operations

Hyperconverged
Infrastructure
Operations

Consistent
VMware Cloud
Operations

App-aware
Operations

Integrated
Compliance

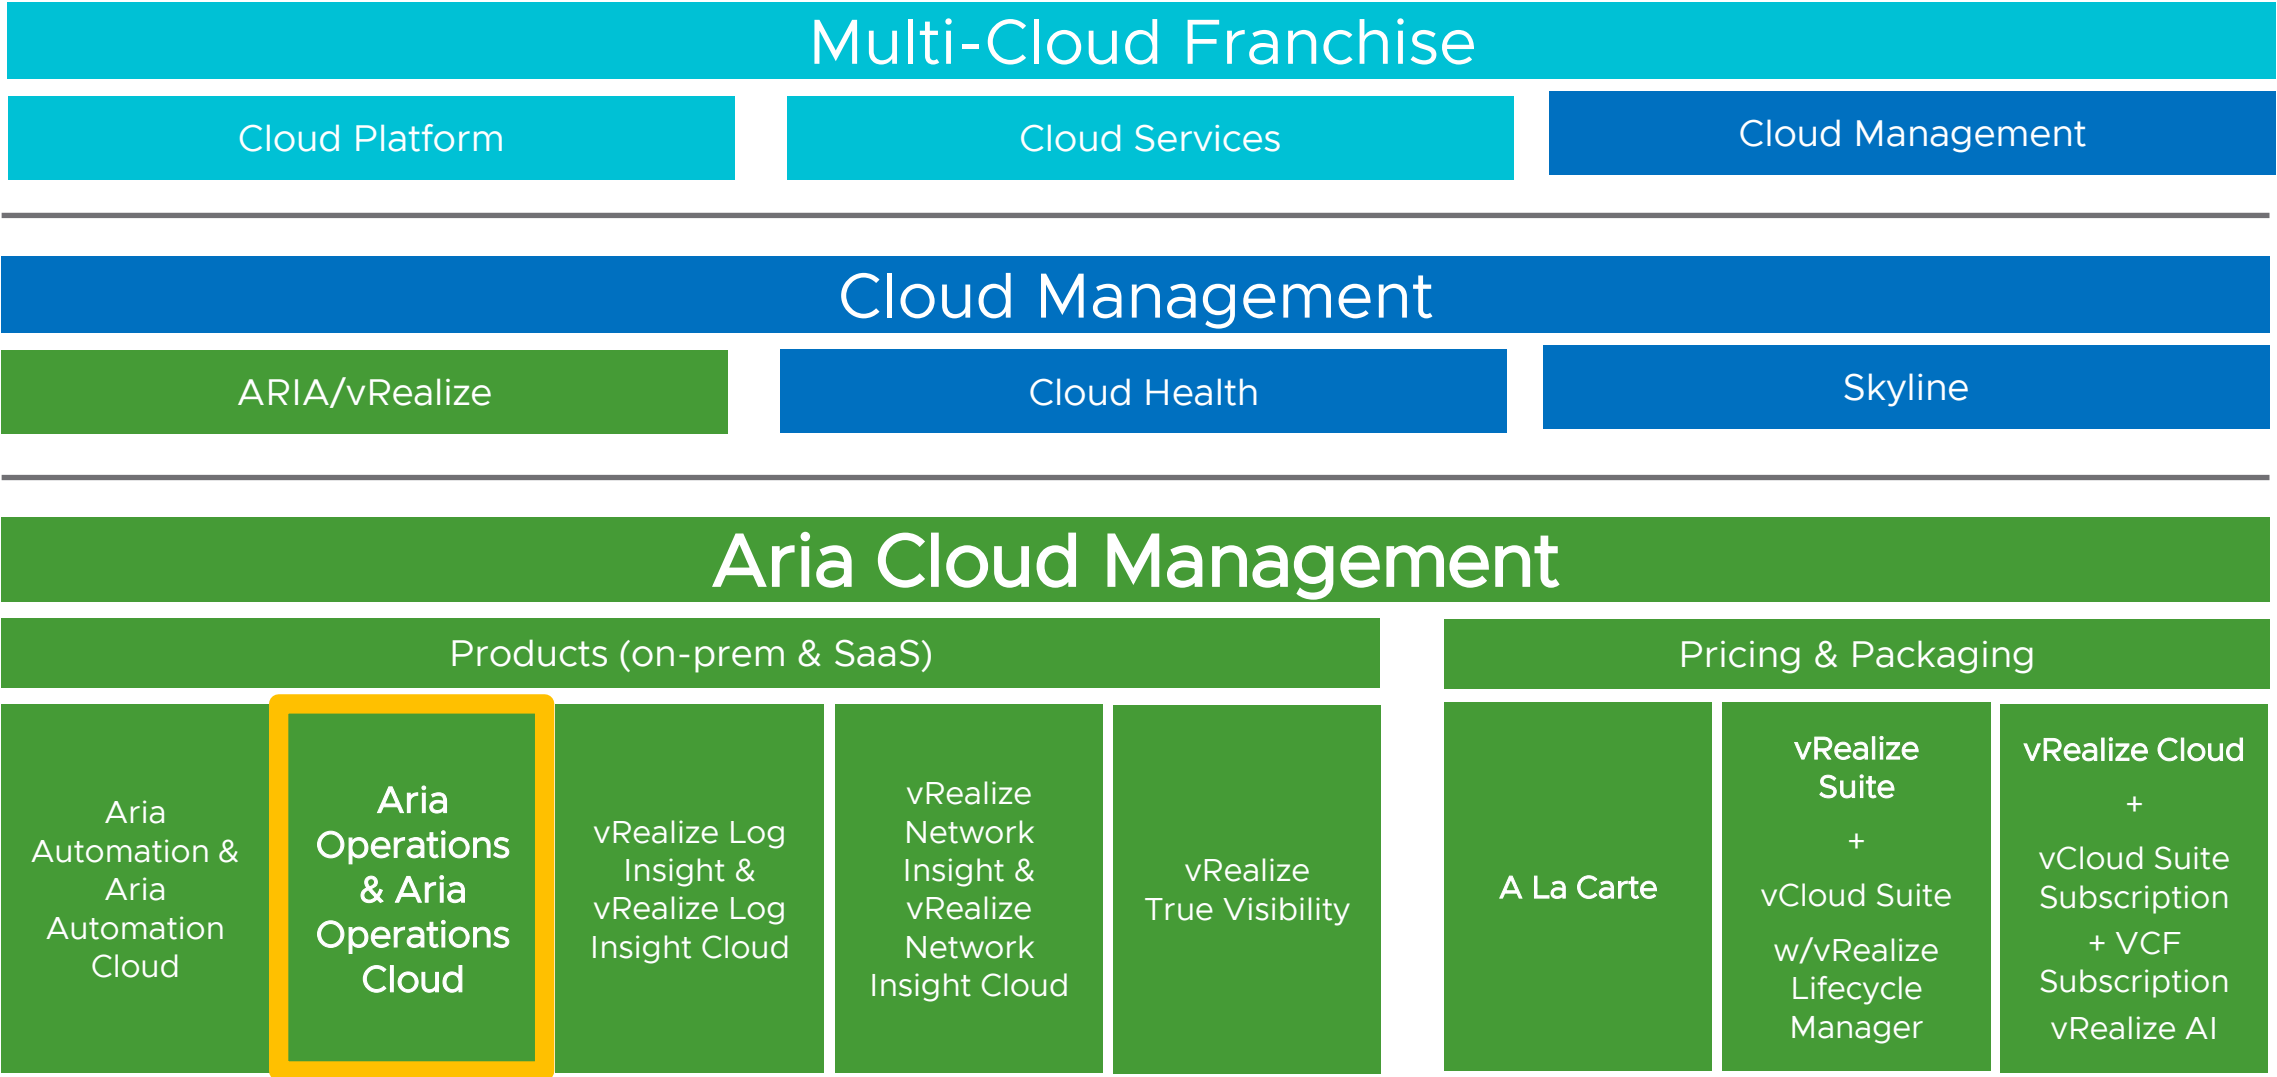

Unified Public
Cloud
Monitoring

Initial Recommendations / Quick win

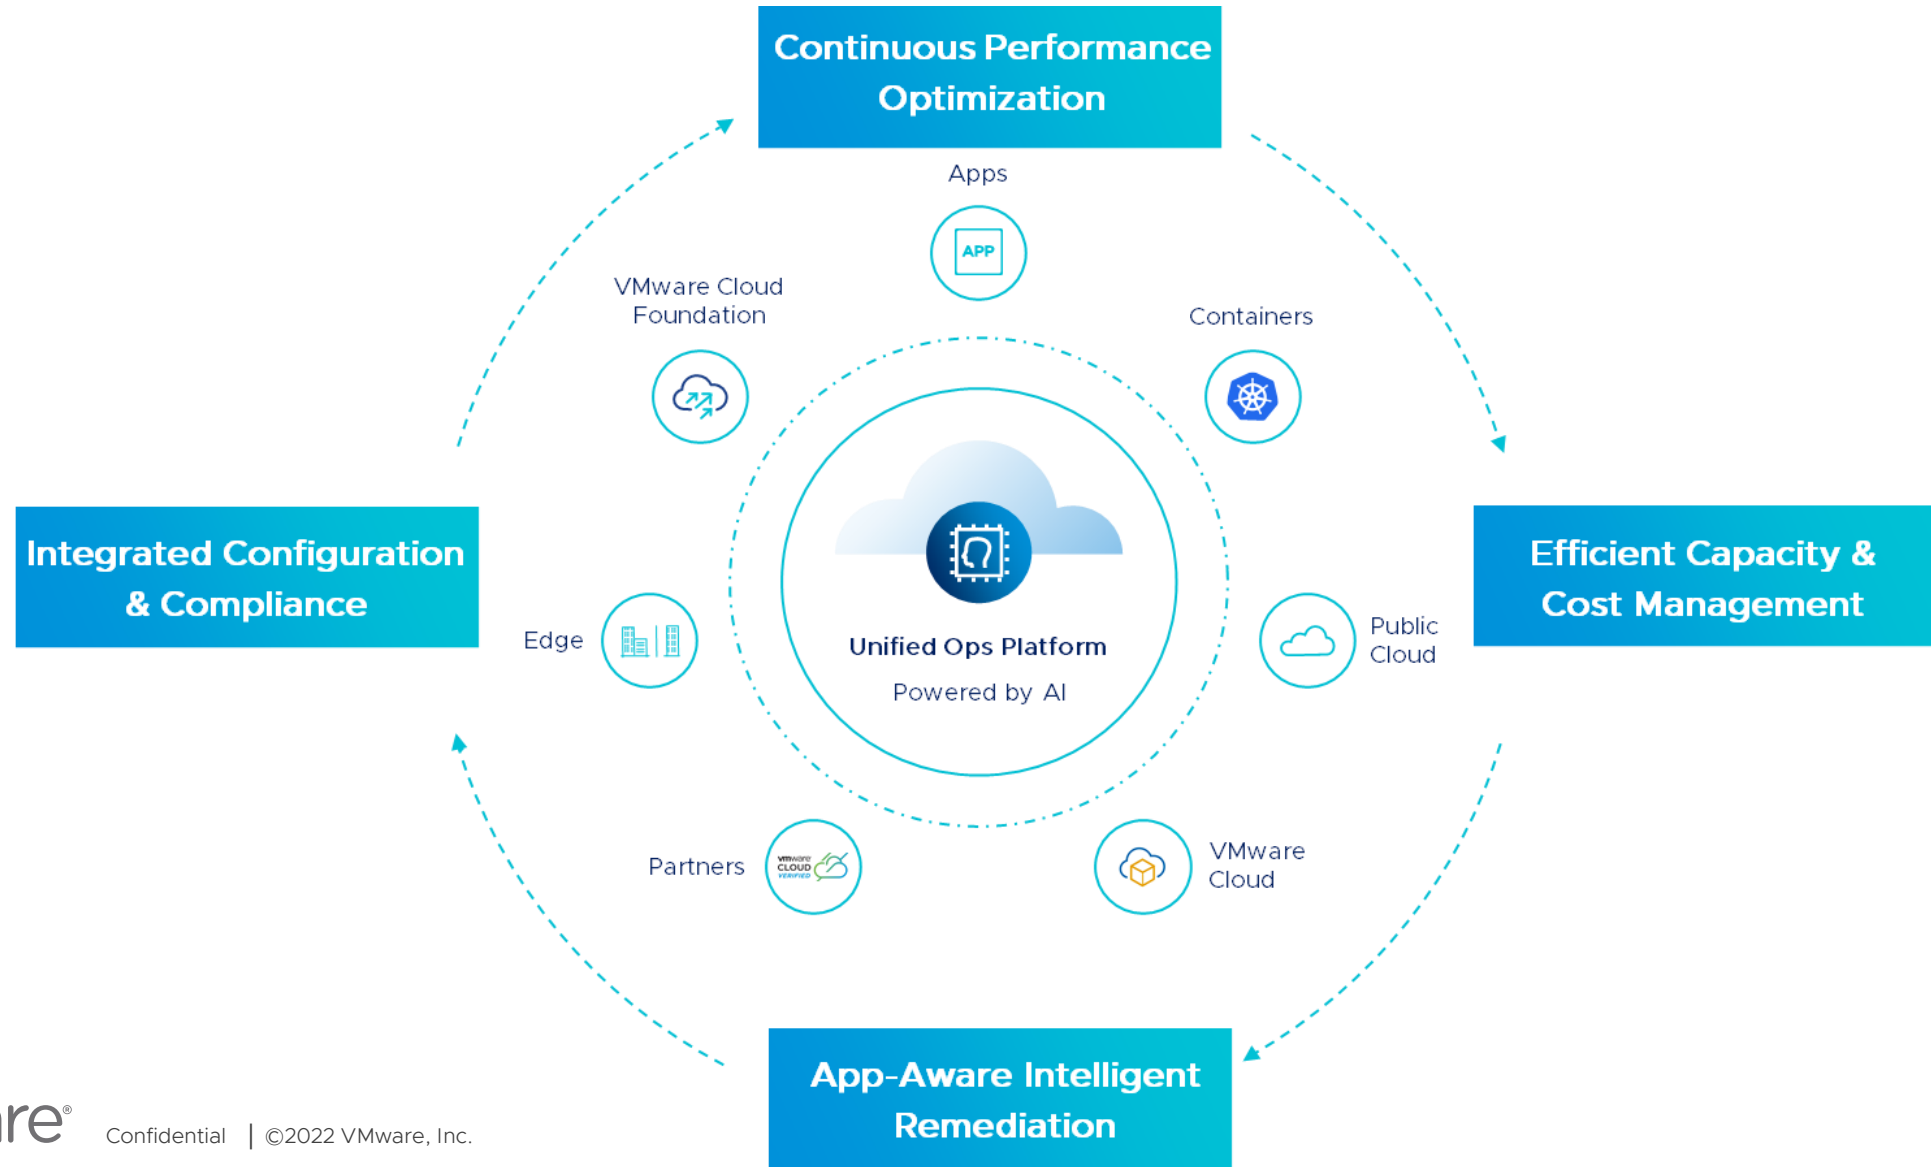

- ❑ **Recommendations.** Focus efforts on critical & recent.
- ❑ Declutter the environment with **Reclamation**
- ❑ **VM RightSizing** –Group Bronze Class VM's. Schedule rightsizing
- ❑ Common used dashboards – Good **OOTB** or custom dashboards
- ❑ Capacity Planning – Time Remaining. Set up policies on 1 particular cluster for capacity planning.
- ❑ Troubleshooting Proactive – Workbench
- ❑ Dashboard Folder – List your favs
- ❑ Custom Groups for application types etc.
- ❑ Adjust cost drivers to improve accuracy. Import env cost reports - Reports
- ❑ Showback and Sustainability (Waste Management) Reports to Senior Management + ESG Team
- ❑ Config/Compliance Management Reports: NTP, DNS, Power Management
- ❑ Integrate Storage Arrays from 3rd Parties – Management Packs
- ❑ Capture legacy O/S's using configuration dashboards and reports
- ❑ Outbound alert settings
- ❑ Change the default email payload to something more user friendly. See - Custom Aria Ops Content
- ❑ Change the Home landing page to a more useable dashboard e.g vSphere Inventory
- ❑ Skyline Data MP – Feed Security Vulnerabilities to Aria Ops. Send as report to SecOps
- ❑ Enable a compliance pack. vSphere Security Guide vs the 100's line excel document = good start!

VMware Cloud Management

Self-Driving Operations with vRealize Operations

Powered by AI, from apps to infra, across VMware Cloud and multiple public clouds, on-premises or SaaS

Feature Parity: vRealize Operations / vRealize Operations Cloud

Quick Start

Operations Overview

Optimize Performance

17

DATACENTERS
REQUIRING OPTIMIZATION

Workload Optimization

Run workload optimization to ensure consistent performance in your datacenters.

Rightsize

Rightsize workloads to ensure performance and reduce bottlenecks.

Recommendations

View and take recommendations to improve overall system performance.

Optimization History

See completed optimization actions.

Optimize Capacity

US\$21,195

TOTAL SAVINGS OPPORTUNITY

Assess Capacity

Determine if there is sufficient capacity in your environment.

Reclaim

Reduce waste by reclaiming unused resources.

Plan

Run scenarios to plan for future projects and changes.

Assess Cost

Analyze the costs of running your environment.

Optimize Cost

Get an overview of your Return on Investment.

Troubleshoot

ISSUES USING ALERTS, LOGS AND DASHBOARDS

Workbench

Troubleshoot by finding potential root causes in a given scope and time.

Alerts

Troubleshoot by reviewing active alerts in the system.

Logs

Troubleshoot by examining and analyzing logs.

Dashboards

Troubleshoot using dashboards

Applications

Troubleshoot with in applications boundaries

Manage Configuration

AND COMPLIANCE BY BENCHMARKS AND OBJECT TYPES

Compliance

Assess and Manage Compliance.

Configuration

Manage and assess configuration by object type:

Virtual Machine

Host

Cluster

Distributed Switch

Sustainability

View power consumption and carbon footprint, track decarbonization journey with VMware Green Score and receive actionable recommendations for further optimization.

SUPPORT

Continuous Performance Optimization

“

Can I achieve automated resolution of VM performance issues?

”

“

How do I prevent VMs from getting deployed to clusters that are full?

”

“

How can I make sure clusters don't get filled beyond target?

”

“

Can I learn to predict & avoid contention?

”

“

Can I limit VM movement to manage licensing costs?

”

“

Can I consolidate and reuse for a new project?

”

Intent-Driven Continuous Performance Optimization

DATACENTERS
REQUIRING OPTIMIZATION

Workload Optimization

Run workload optimization to ensure consistent performance in your datacenters.

Rightsize

Rightsize workloads to ensure performance and reduce bottlenecks.

Recommendations

View and take recommendations to improve overall system performance.

Optimization History

See completed optimization actions.

- ❑ Automated Intent-driven Workload Optimization and balancing for **private cloud**
- ❑ **Host-based placement** for private cloud based on business and operational intent
- ❑ **Placement Optimization** for vSAN workloads that is Resync, slack-space & SPBM aware
- ❑ Intent-driven Workload Optimization and balancing for **VMware Cloud on AWS**
- ❑ **Integration with vRealize Automation** for initial placement and on-going balancing
- ❑ Next-gen CMP with **shared constructs** like cloud accounts, cloud zones and projects across Operations and Automation
- ❑ Workload **right-sizing** for hybrid cloud
- ❑ **Predictive DRS** to avoid contention

Optimize & Plan Capacity across Private, Hybrid and Public Clouds

“

What is my total capacity and how much is used/remaining

”

“

How much capacity can I reclaim? Cost?

”

“

When will I run out and how much more is needed? Cost?

”

“

What is the cost of running VMs on private vs hybrid or public cloud?

”

“

What are the costs and usage in private/public clouds?

”

Efficient Capacity and Cost Management

Operations Overview

- ❑ Demand and Allocation
Aware Capacity Management and Planning
- ❑ Reclaim overprovisioned capacity, incl. from Orphan VMDKs
- ❑ What-If scenarios for: workload and h/w removal; HCI planning
- ❑ Stacked what-if scenarios
- ❑ Migration planning to public cloud and VCPP partners
- ❑ VMware Cloud on AWS migration assessment

Optimize Capacity

US\$21,195

TOTAL SAVINGS OPPORTUNITY

Assess Capacity

Determine if there is sufficient capacity in your environment.

Reclaim

Reduce waste by reclaiming unused resources.

Plan

Run scenarios to plan for future projects and changes.

Assess Cost

Analyze the costs of running your environment.

Optimize Cost

Get an overview of your Return on Investment.

- ❑ Cost drivers: vSAN costs, individual server costs, total monthly OpEX costs
- ❑ Enhanced Private Cloud Costing with per datacenter cost drivers
- ❑ Rate-card based pricing
- ❑ Private cloud cost comparison across data centers for new workload planning
- ❑ Monitor costs for VMware Cloud on AWS infrastructure
- ❑ Public cloud costing via CloudHealth integration

Intelligent Remediation

Intelligent Remediation

- ❑ Troubleshooting Workbench for expedited root cause analysis
- ❑ Kubernetes monitoring including vSphere 7 with Tanzu discovery, monitoring, troubleshooting, capacity management; support for Openshift, EKS, AKS, GKE, and downstream “Kubernetes anywhere”
- ❑ Line of sight from apps to Infra, including (cloud-exclusive) APM tool integration and near real-time monitoring
- ❑ Simplified alert creation, dashboard mgmt, consistent navigation & summary pages
- ❑ Metric Correlation (including logs-as-metrics and log/metric correlation) and Super Metrics workflows for faster troubleshooting
- ❑ OOB application monitoring (20 total) via Telegraf agents and custom script execution
- ❑ Native Service Discovery with support for top-n processes and one-time script execution

Investment.

Workbench

Troubleshoot by finding potential root causes in a given scope and time.

Alerts

Troubleshoot by reviewing active alerts in the system.

Logs

Troubleshoot by examining and analyzing logs.

Dashboards

Troubleshoot using dashboards

Applications

Troubleshoot within application boundaries

- ❑ AWS, Azure, and GCP monitoring, including capacity management for AWS
- ❑ vRealize Network Insight integration (including app discovery)
- ❑ vRealize Log Insight integration
- ❑ Service Now integration
- ❑ Slack integration
- ❑ Enhancement to management packs – SDDC, Cloud Pod, Container/PKS, vRO, NSX-T, VxRail, SNMP etc
- ❑ Enhanced insights via Skyline

View power consumption and carbon footprint, track decarbonization journey with VMware Green Scc and receive actionable recommendations for further optimization.

Integrated Compliance, Configuration, and Sustainability

“

What is my compliance stature against my org policies?

”

“

Am I meeting regulatory compliance needs?

”

“

How can I remediate drift?

”

“

Will I pass my compliance audit (PCI, HIPPA, DISA, CIS, ISO, FISMA)?

”

“

where are we in our sustainability journey?

”

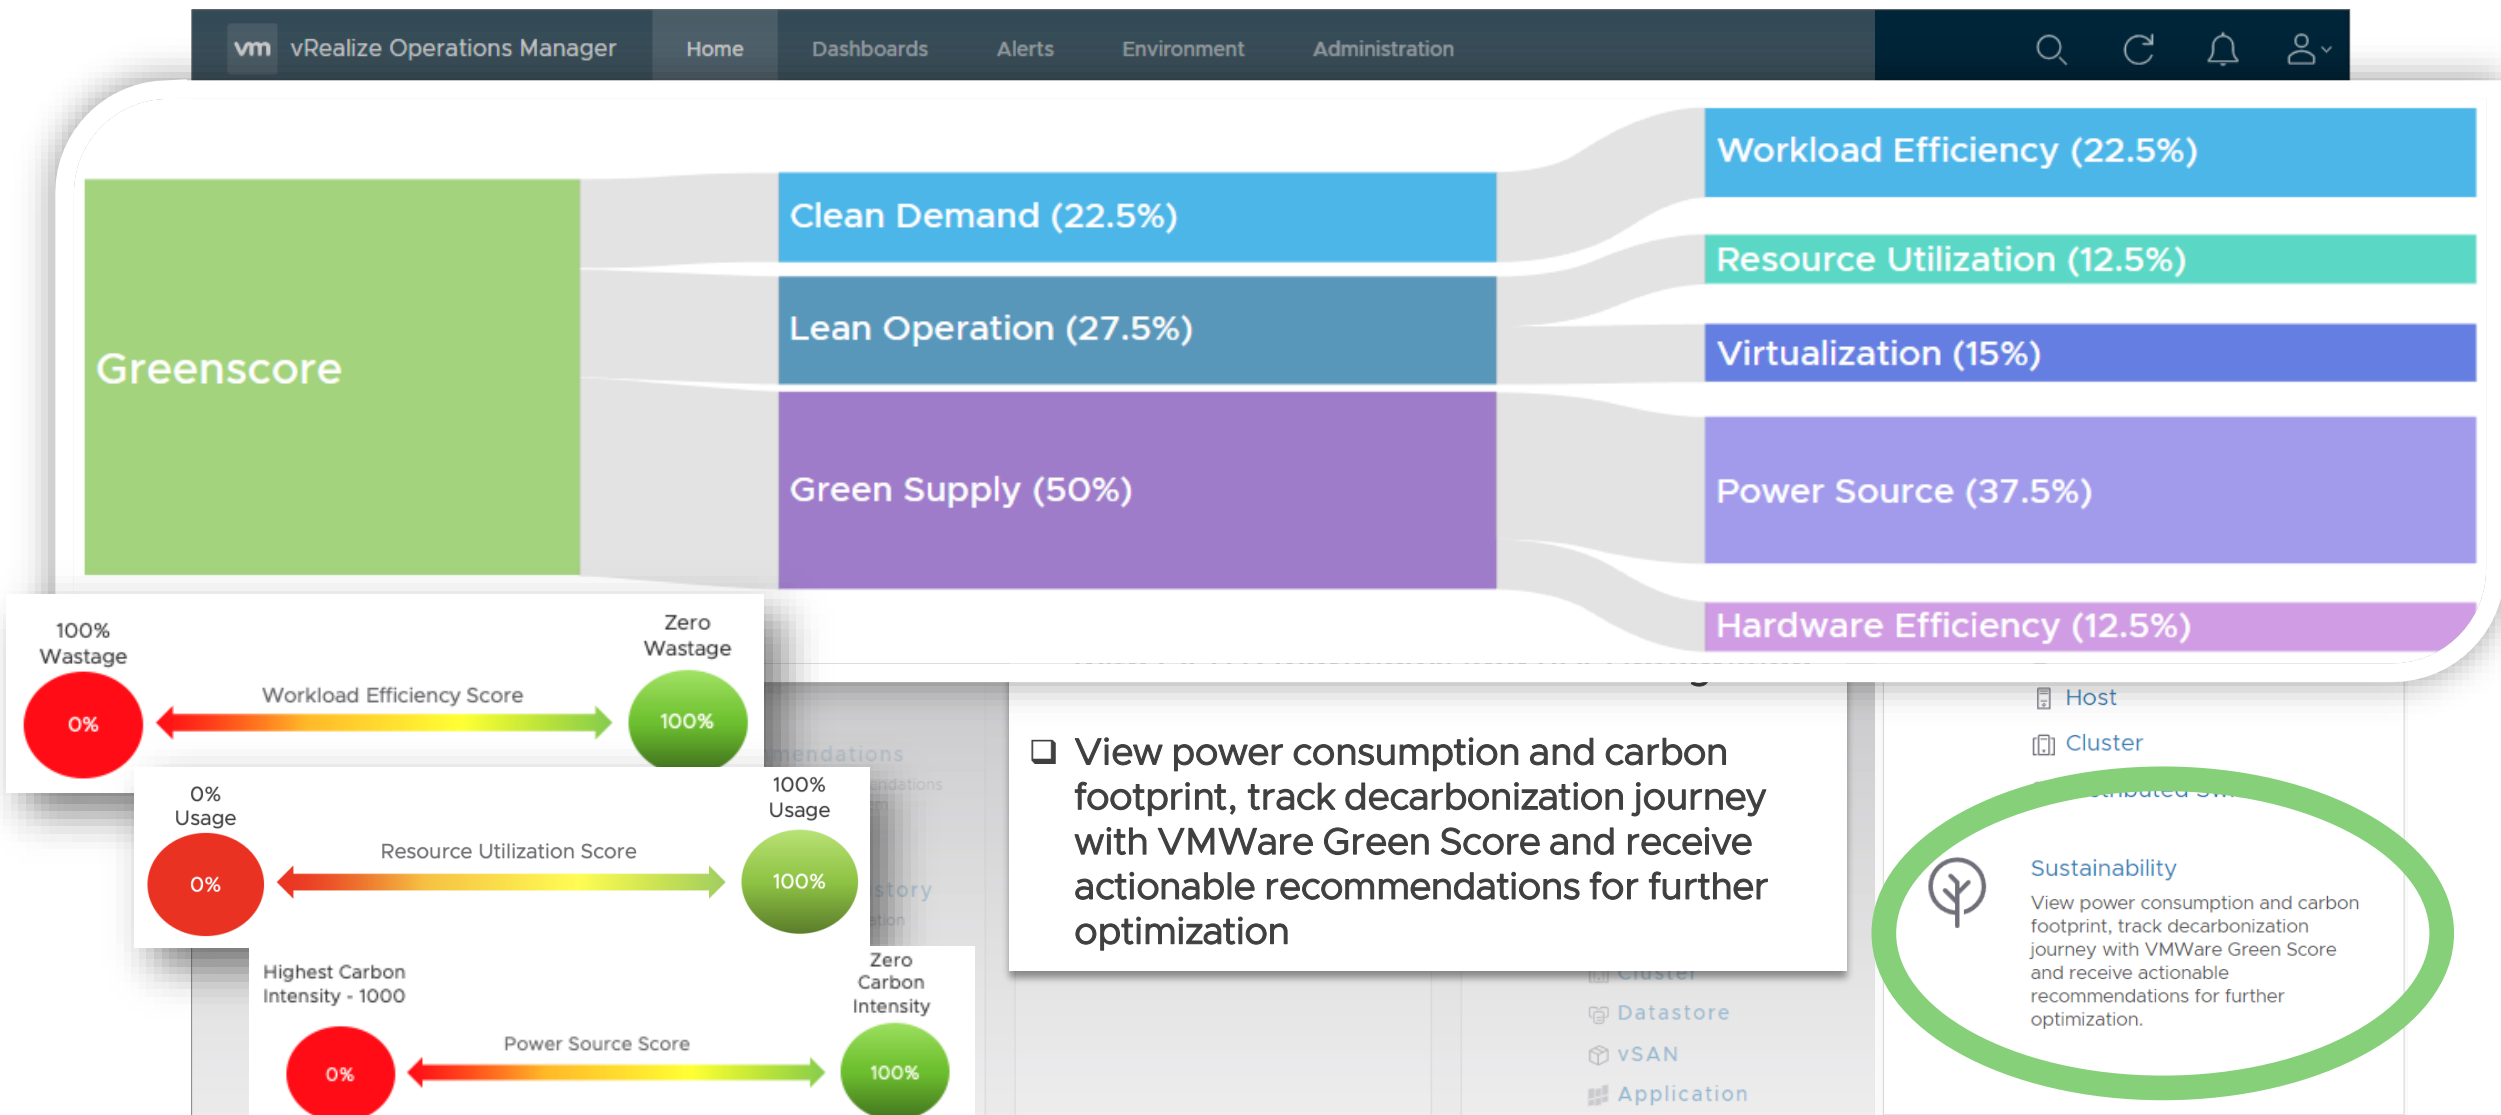

Integrated Compliance & Configuration

The screenshot displays the VMware vRealize Operations Manager interface. The top navigation bar includes 'vm vRealize Operations Manager', 'Home', 'Dashboards', 'Alerts', 'Environment', and 'Administration'. On the right, there are icons for search, refresh, notifications, and user profile. The left sidebar shows a 'Quick Start' menu with options like 'Operations Overview', 'Optimize Performance', 'Optimize Capacity', 'Compliance', and 'Manage Applications'. The main content area is titled 'Quick Start' and features a '4 DATACENTERS REQUIRING OPTIMIZATION' card. A central overlay box lists key features: Simplified Compliance Workflows, Regulatory and SDDC compliance content (vSphere, NSX-T, vSAN), Monitoring compliance for VMs in VMware Cloud on AWS, Ability to create Custom Compliance standards, Automated configuration management with OOTB workflows and vRO integration, and Viewing power consumption and carbon footprint with VMWare Green Score. The right sidebar shows 'Manage Configuration' and 'AND COMPLIANCE BY BENCHMARKS AND OBJECT TYPES', with links to 'Compliance', 'Configuration', and 'Sustainability' sections.

- ❑ Simplified Compliance Workflows
- ❑ Regulatory and SDDC compliance content (vSphere, NSX-T, vSAN)
- ❑ Monitor compliance for VMs in VMware Cloud on AWS
- ❑ Ability to create Custom Compliance standards
- ❑ Automated configuration management with OOTB workflows and vRO integration
- ❑ View power consumption and carbon footprint, track decarbonization journey with VMWare Green Score and receive actionable recommendations for further optimization

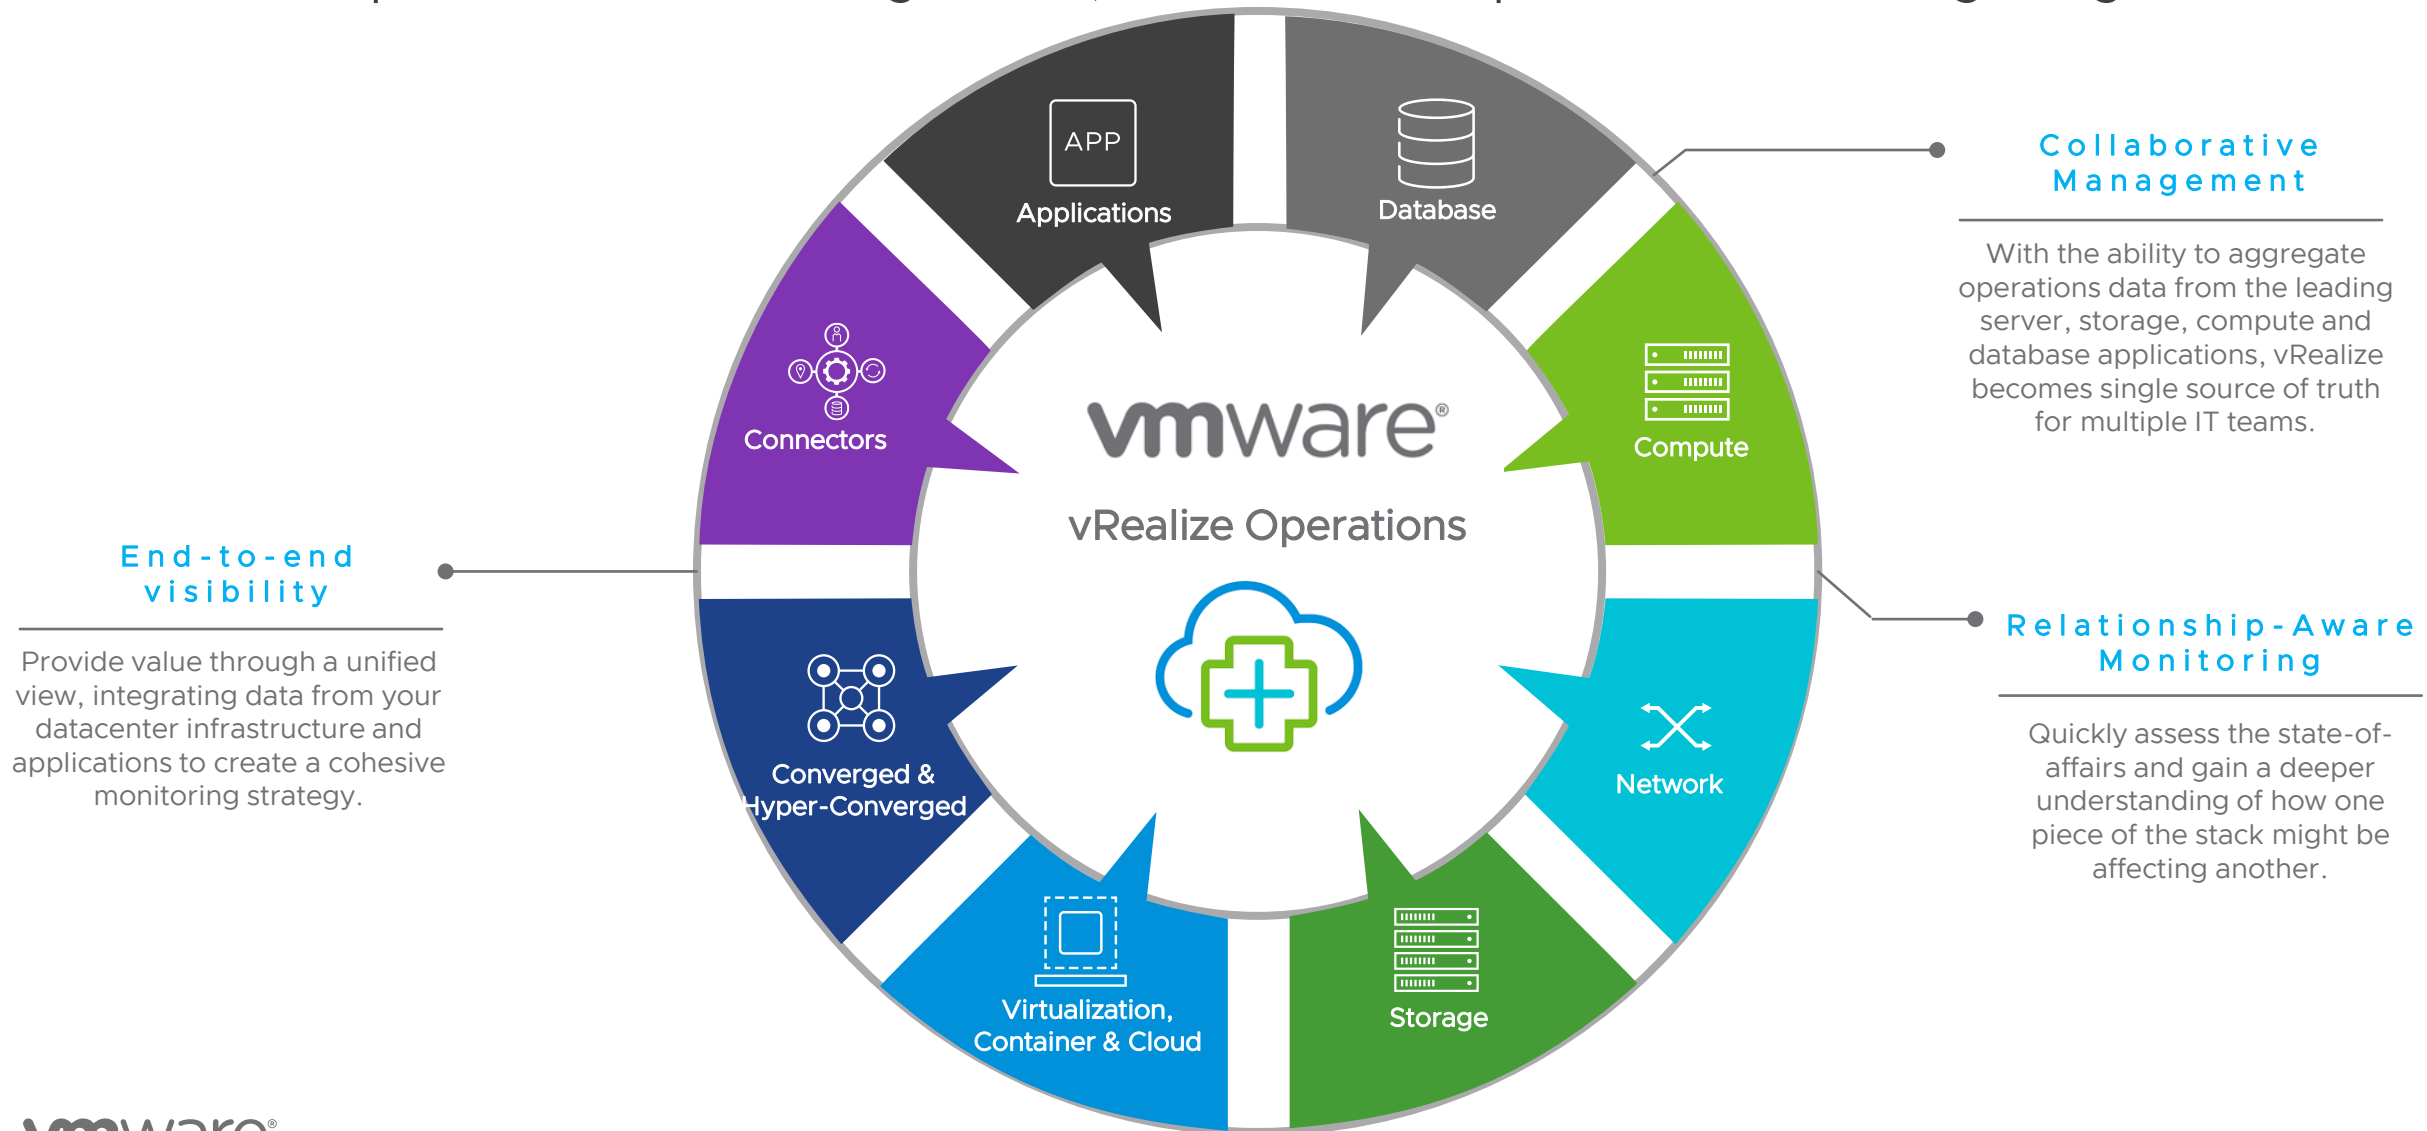

SUSTAINABILITY

Vmware Green Score

vRealize True Visibility Suite

Attain data depth & context in a single view, with relationship-aware monitoring integrations

Extending vRealize Operations

Adding the vRealize True Visibility Suite

VMware vRealize® True Visibility™ Suite

vRealize Operations

Application-aware monitoring across SDDC and multiple clouds

Cloud planning, capacity optimization and compliance

Automated and proactive workloads management

vRealize True Visibility Suite

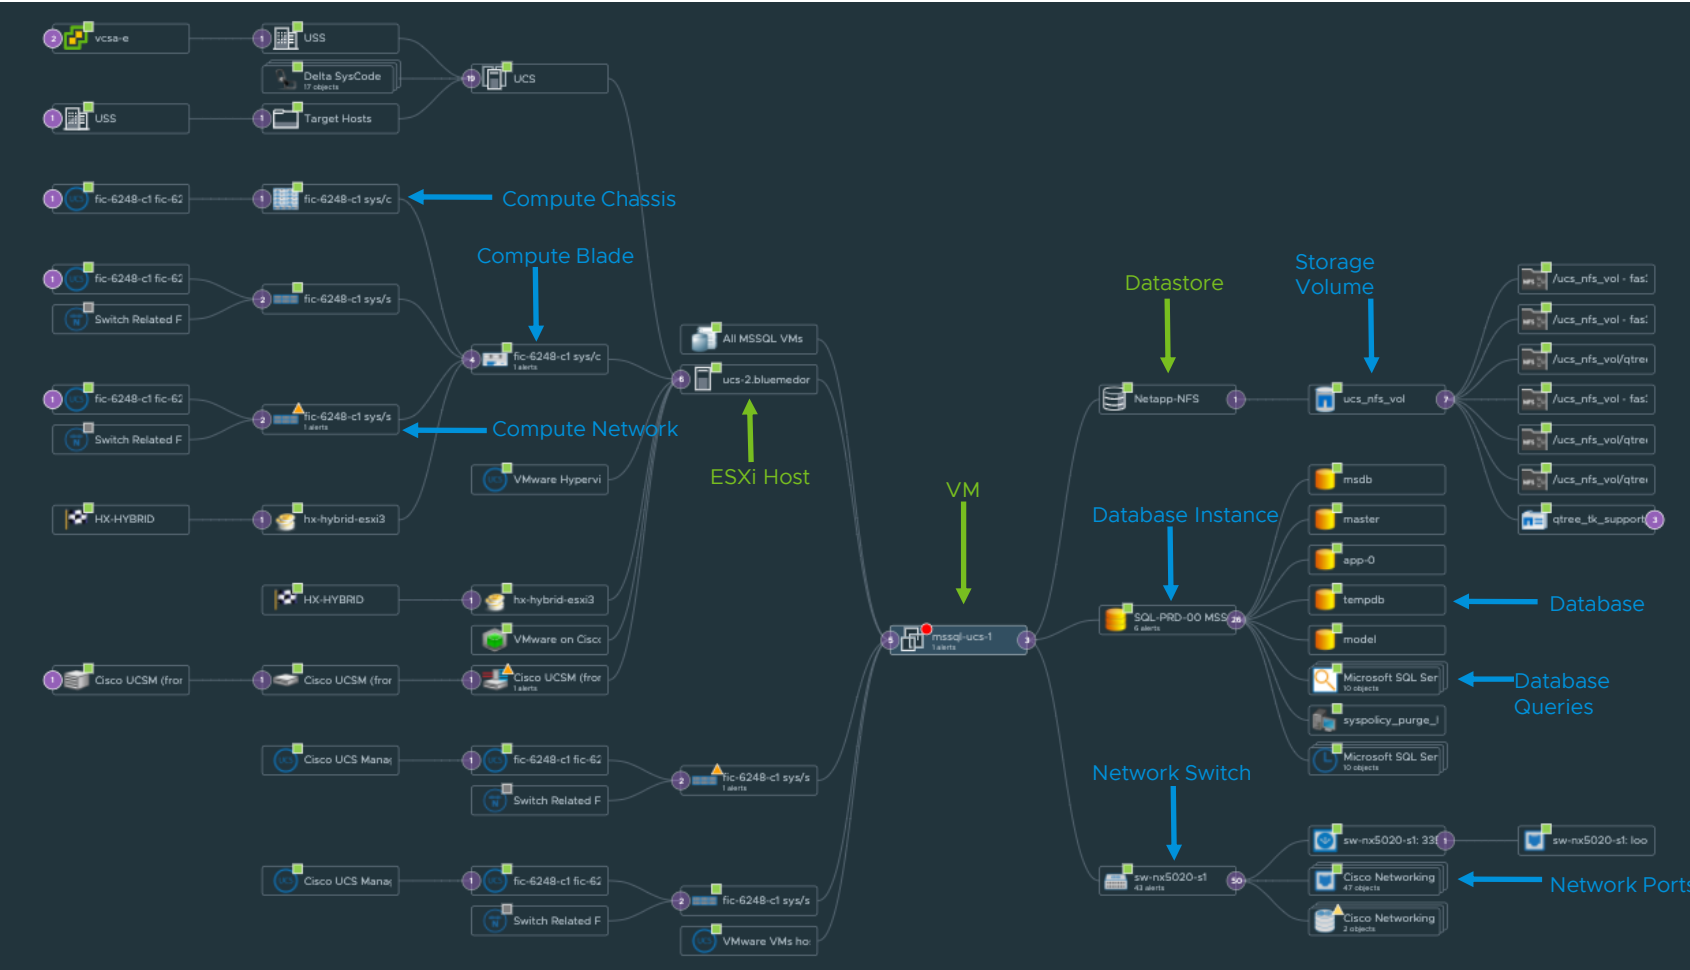

Deeper root cause analysis

Wider collaboration for hybrid cloud management

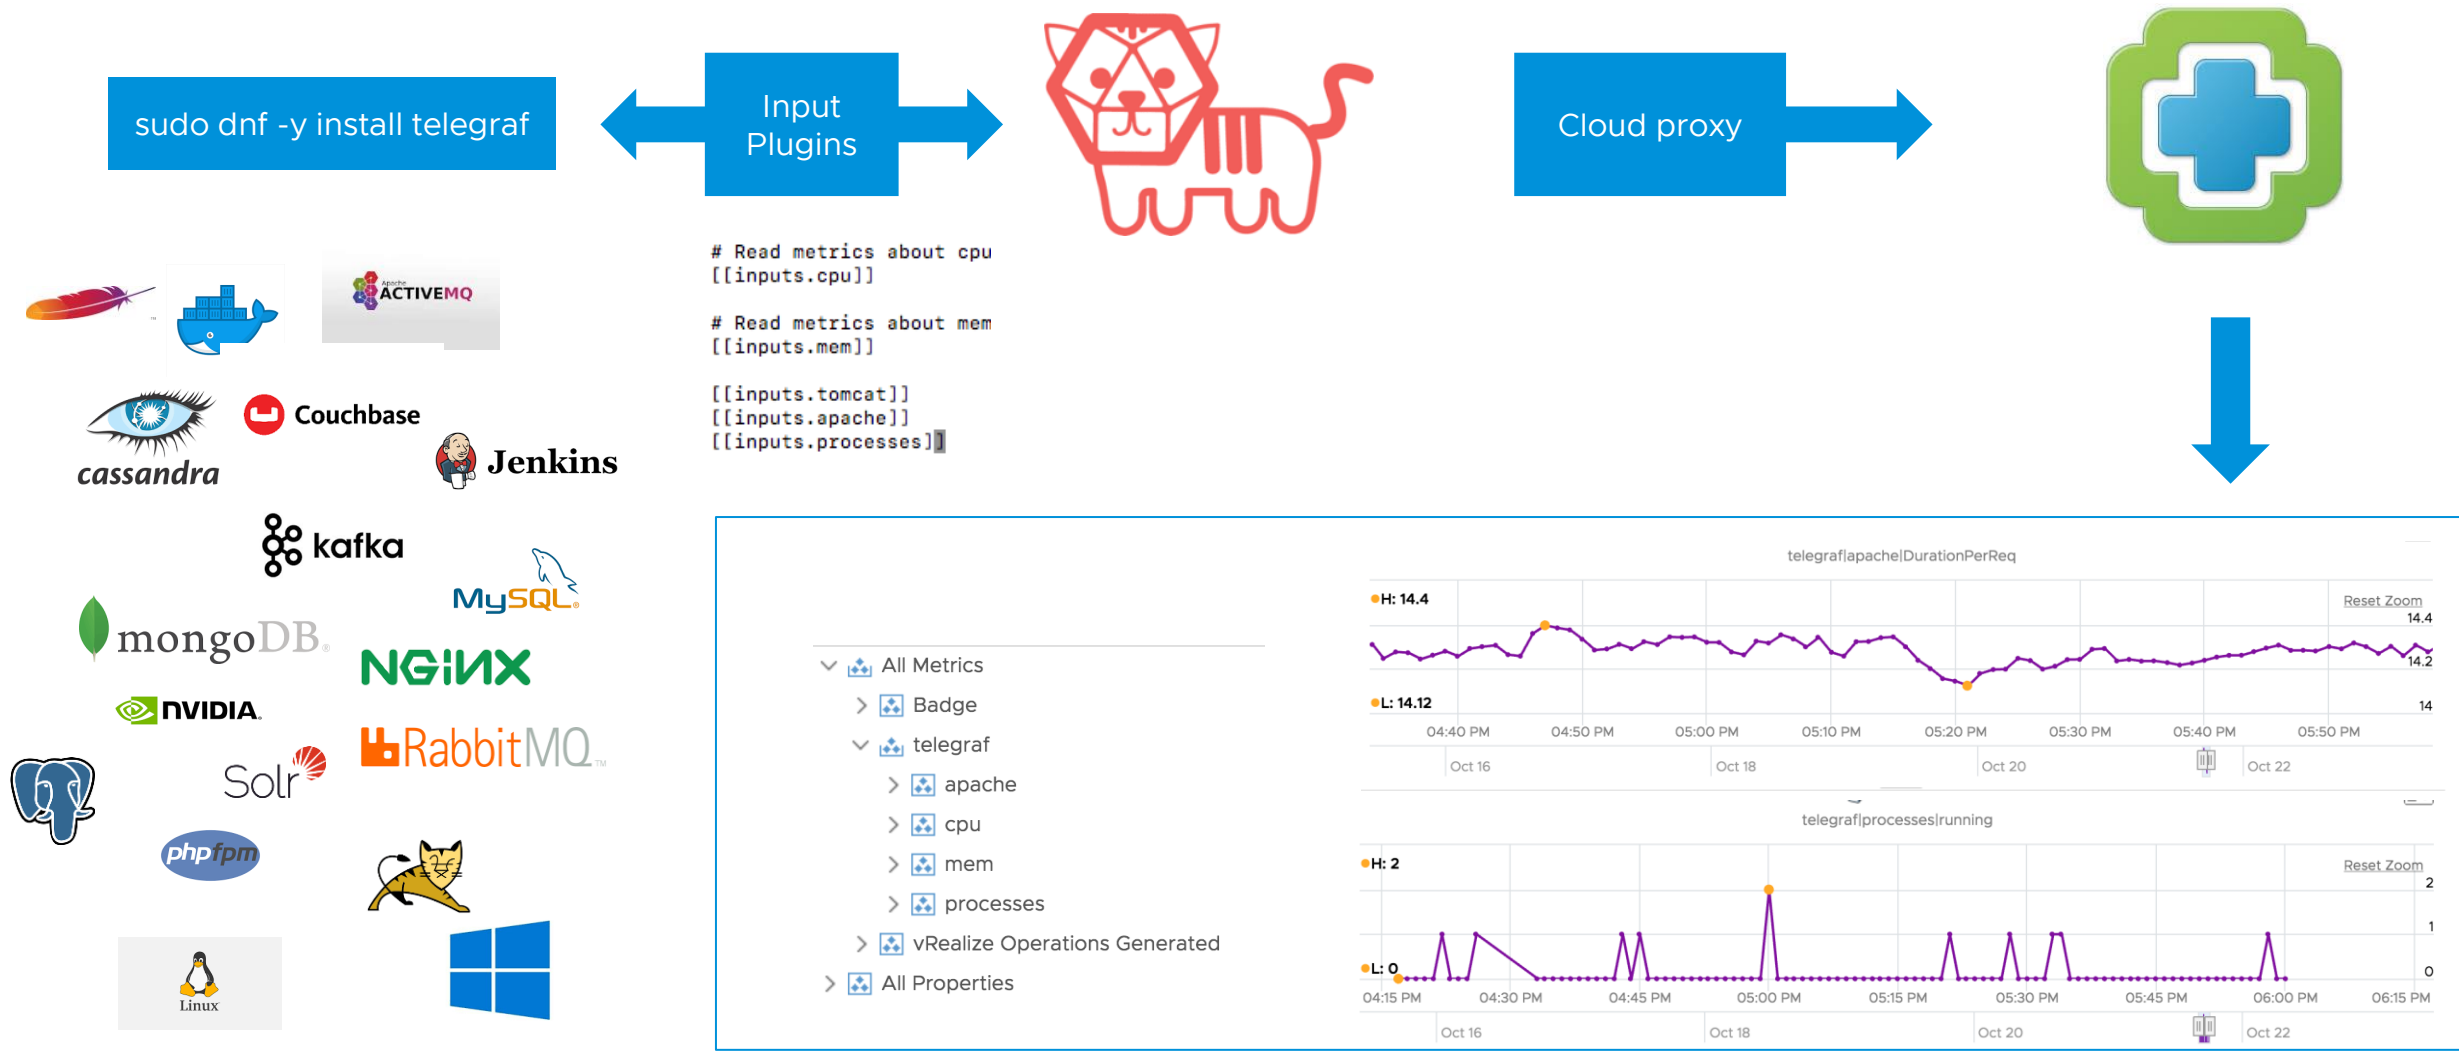

Full stack resource dependency mapping

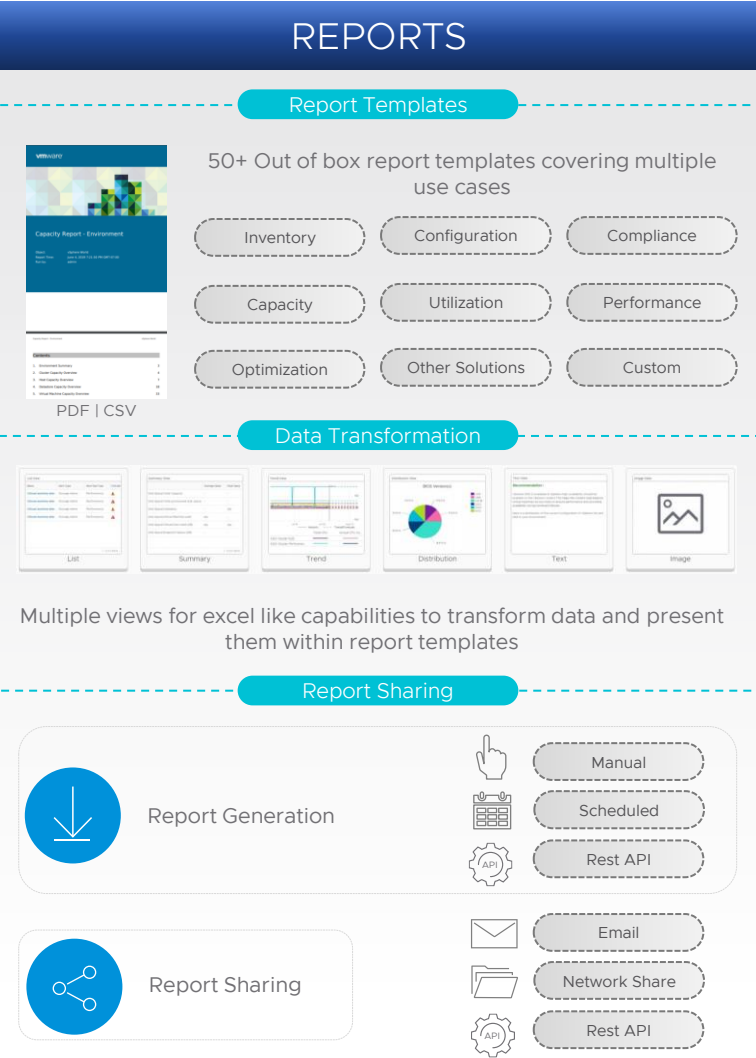

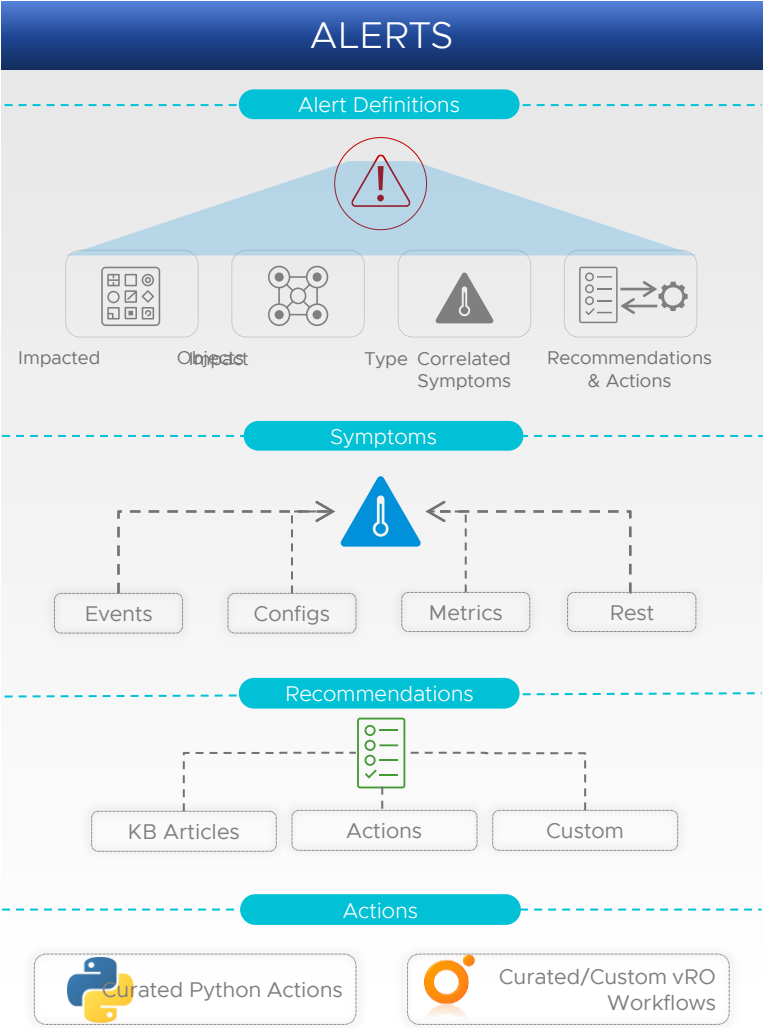

Open source telegraf support

Self-Service data collection supporting 200+ applications

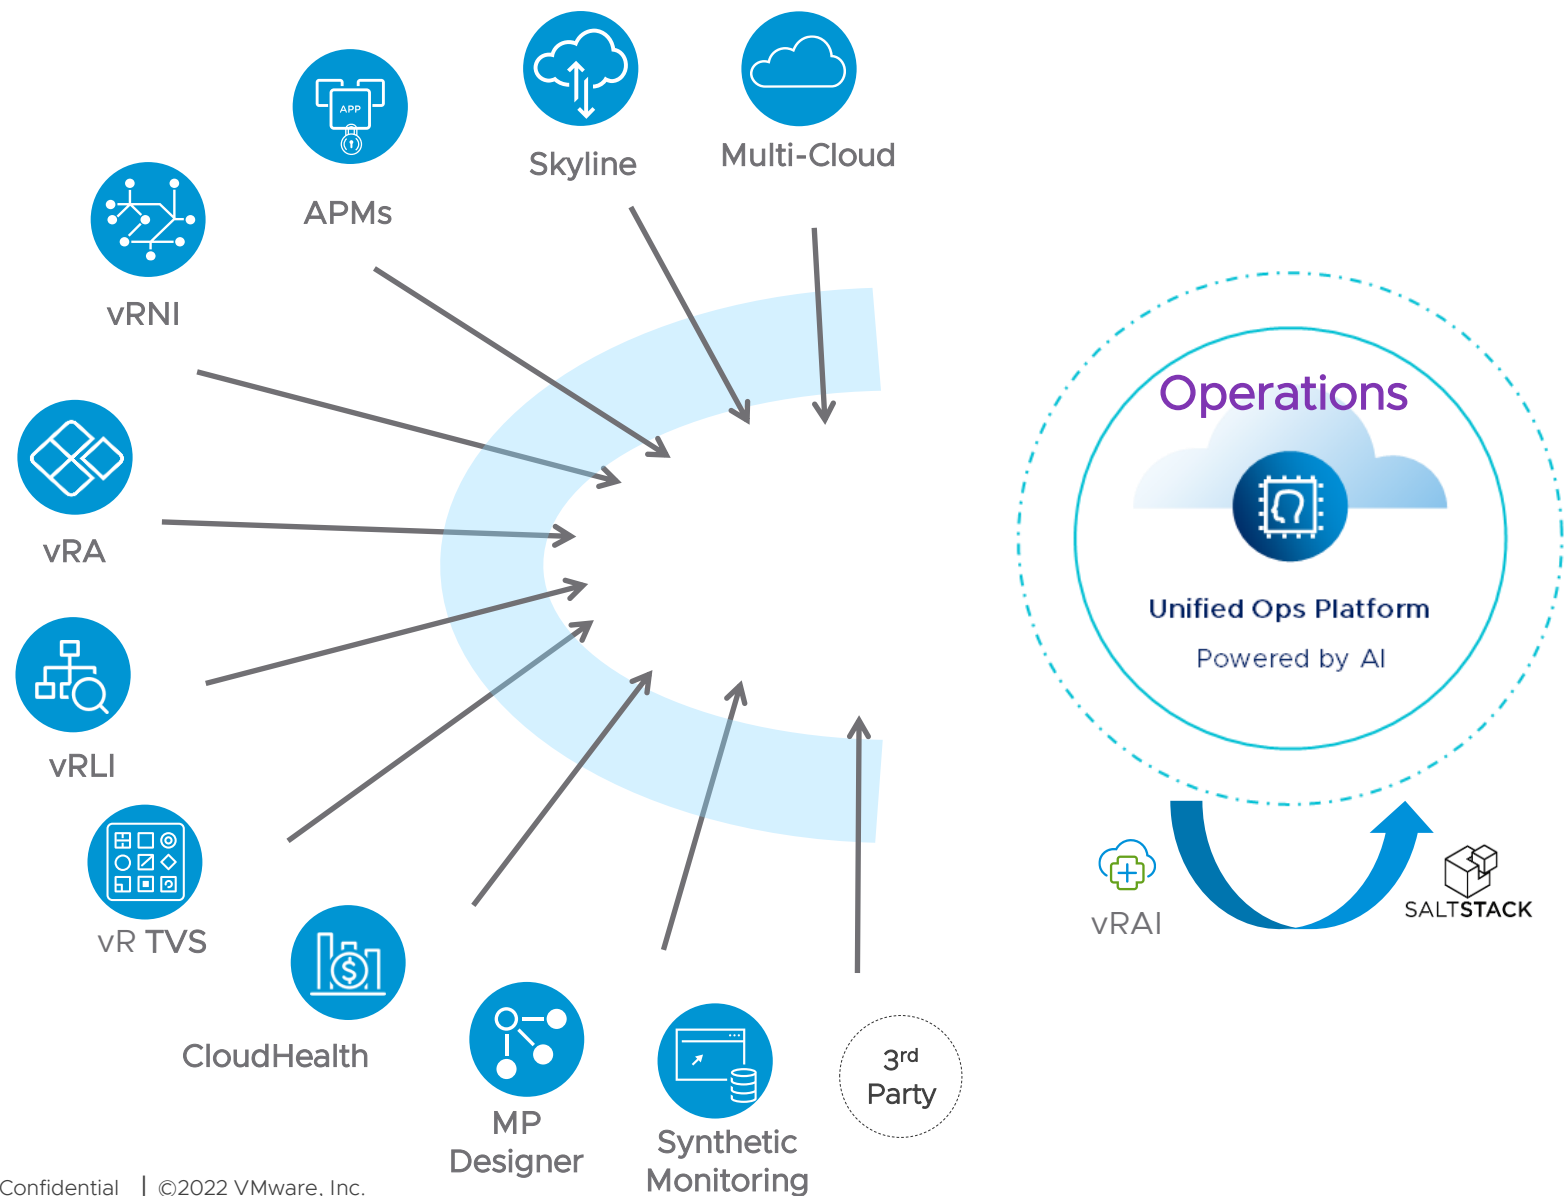

Enhanced visibility with predictive alerts, dashboard and reports

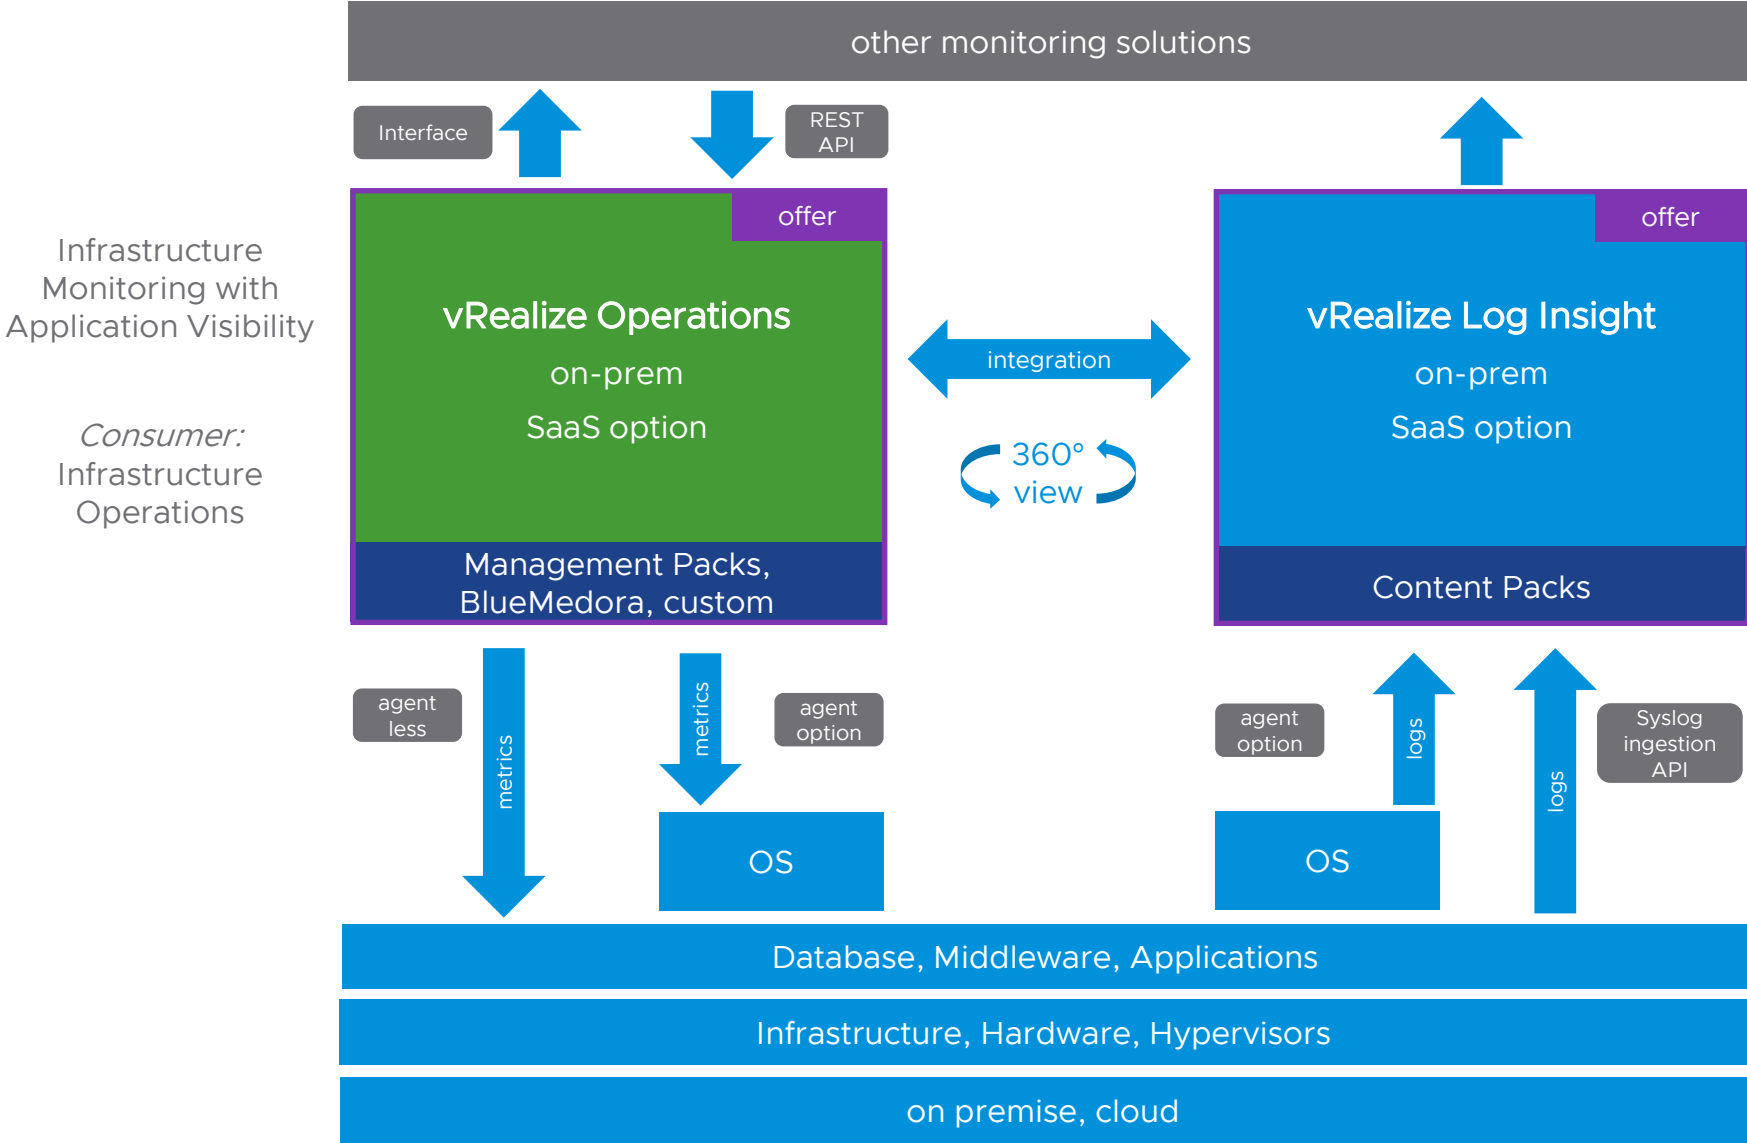

Increase monitoring efficiency with key operational tools

Connecting to Aria Operations

With Log Insight

Aria Operations and Aria Automation Integration

Public Cloud Deployments

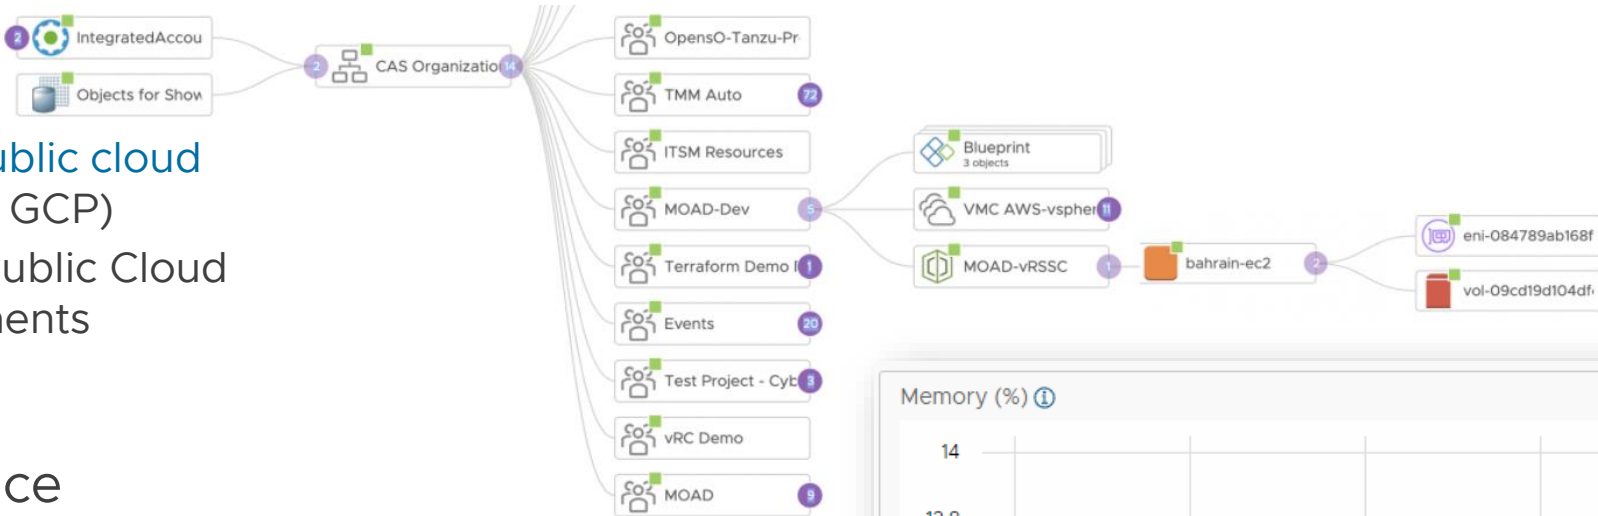

- Extend capabilities to **public cloud resources** (AWS, Azure, GCP)
- **OOTB Dashboards** for Public Cloud Resources and Deployments

Partial Deployments

- Costing, performance metrics, optimization recommendations in vRA

Project Level Limits

- Visibility to **vRA Project Limits**
- **Alerts** can be created for resource utilization or cost as limits approach

Rightsizable VMs

RIGHT SIZE
